Jury's comment: High-level class. In general many of the pictures would be better with different cropping. Black backgrounds are common, which makes the picture one-dimensional. In a macro photo a nice setting gives extra value.

Class A I: Macro. Baltic Sea and Nordic fresh waters

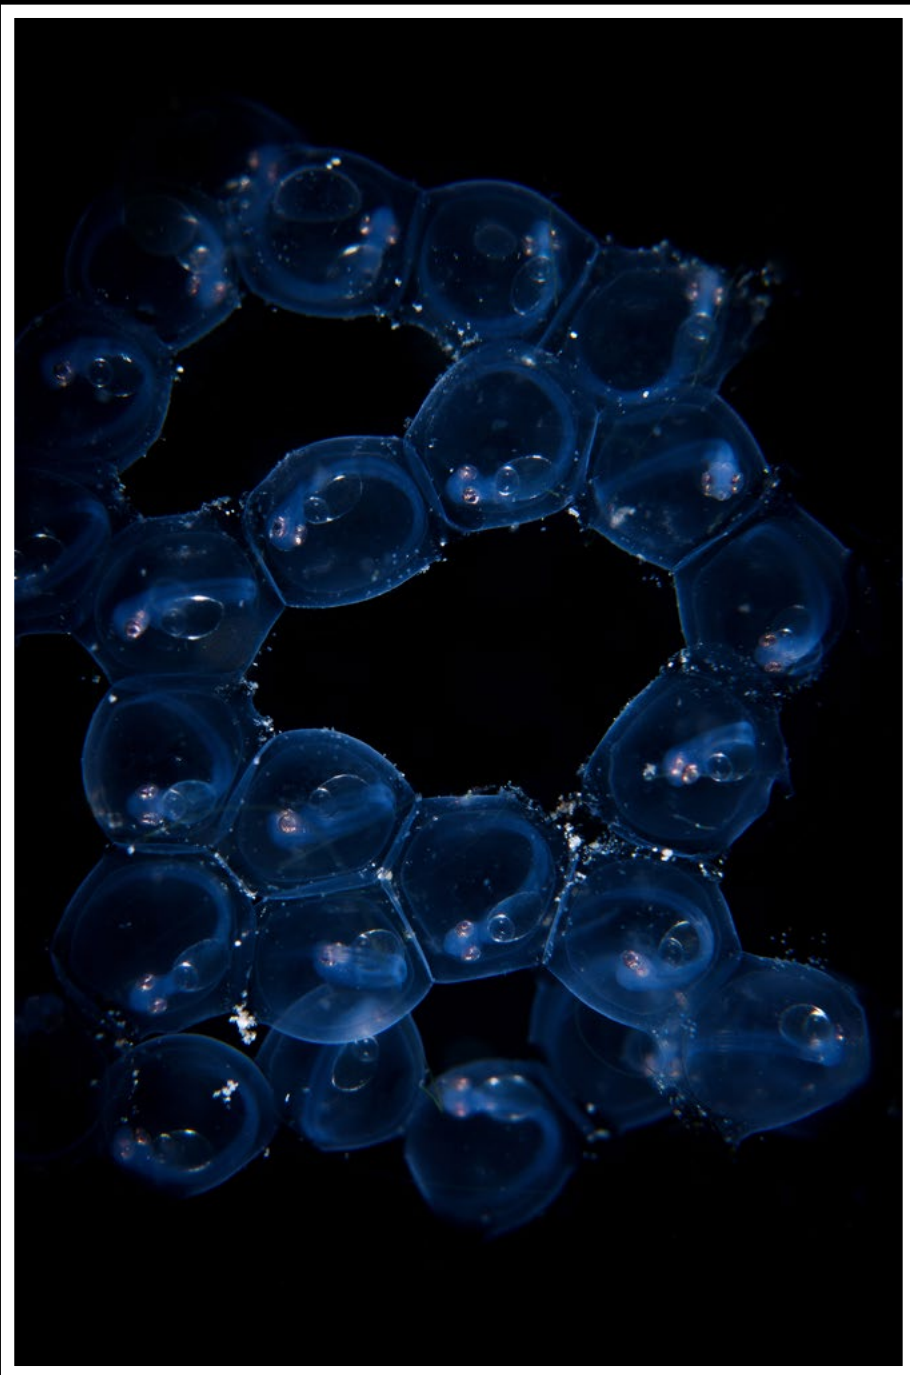

1 . Ice Bubbles.
Tobias Dahlin, SWE

Graphic and three-dimensional, great ice photo. You can look at this for a long time without getting bored. Cropping could be slightly different to make the photo perfect.

2. Fredrik Blomqwist, SWE

There is a lot going on in this photo. Very sympathetic picture. Cheerful, summery colours, good texture. The plant is very graphic. Good technique and composition.

3. Rikard Godlund, SWE

The photo awakens interest by the first glimpse. There are fine characters in the picture, when you study it closer. Mystic and space-like, a lot to look at. Great holes in the roe.
