

Class C: Normal / wide angle

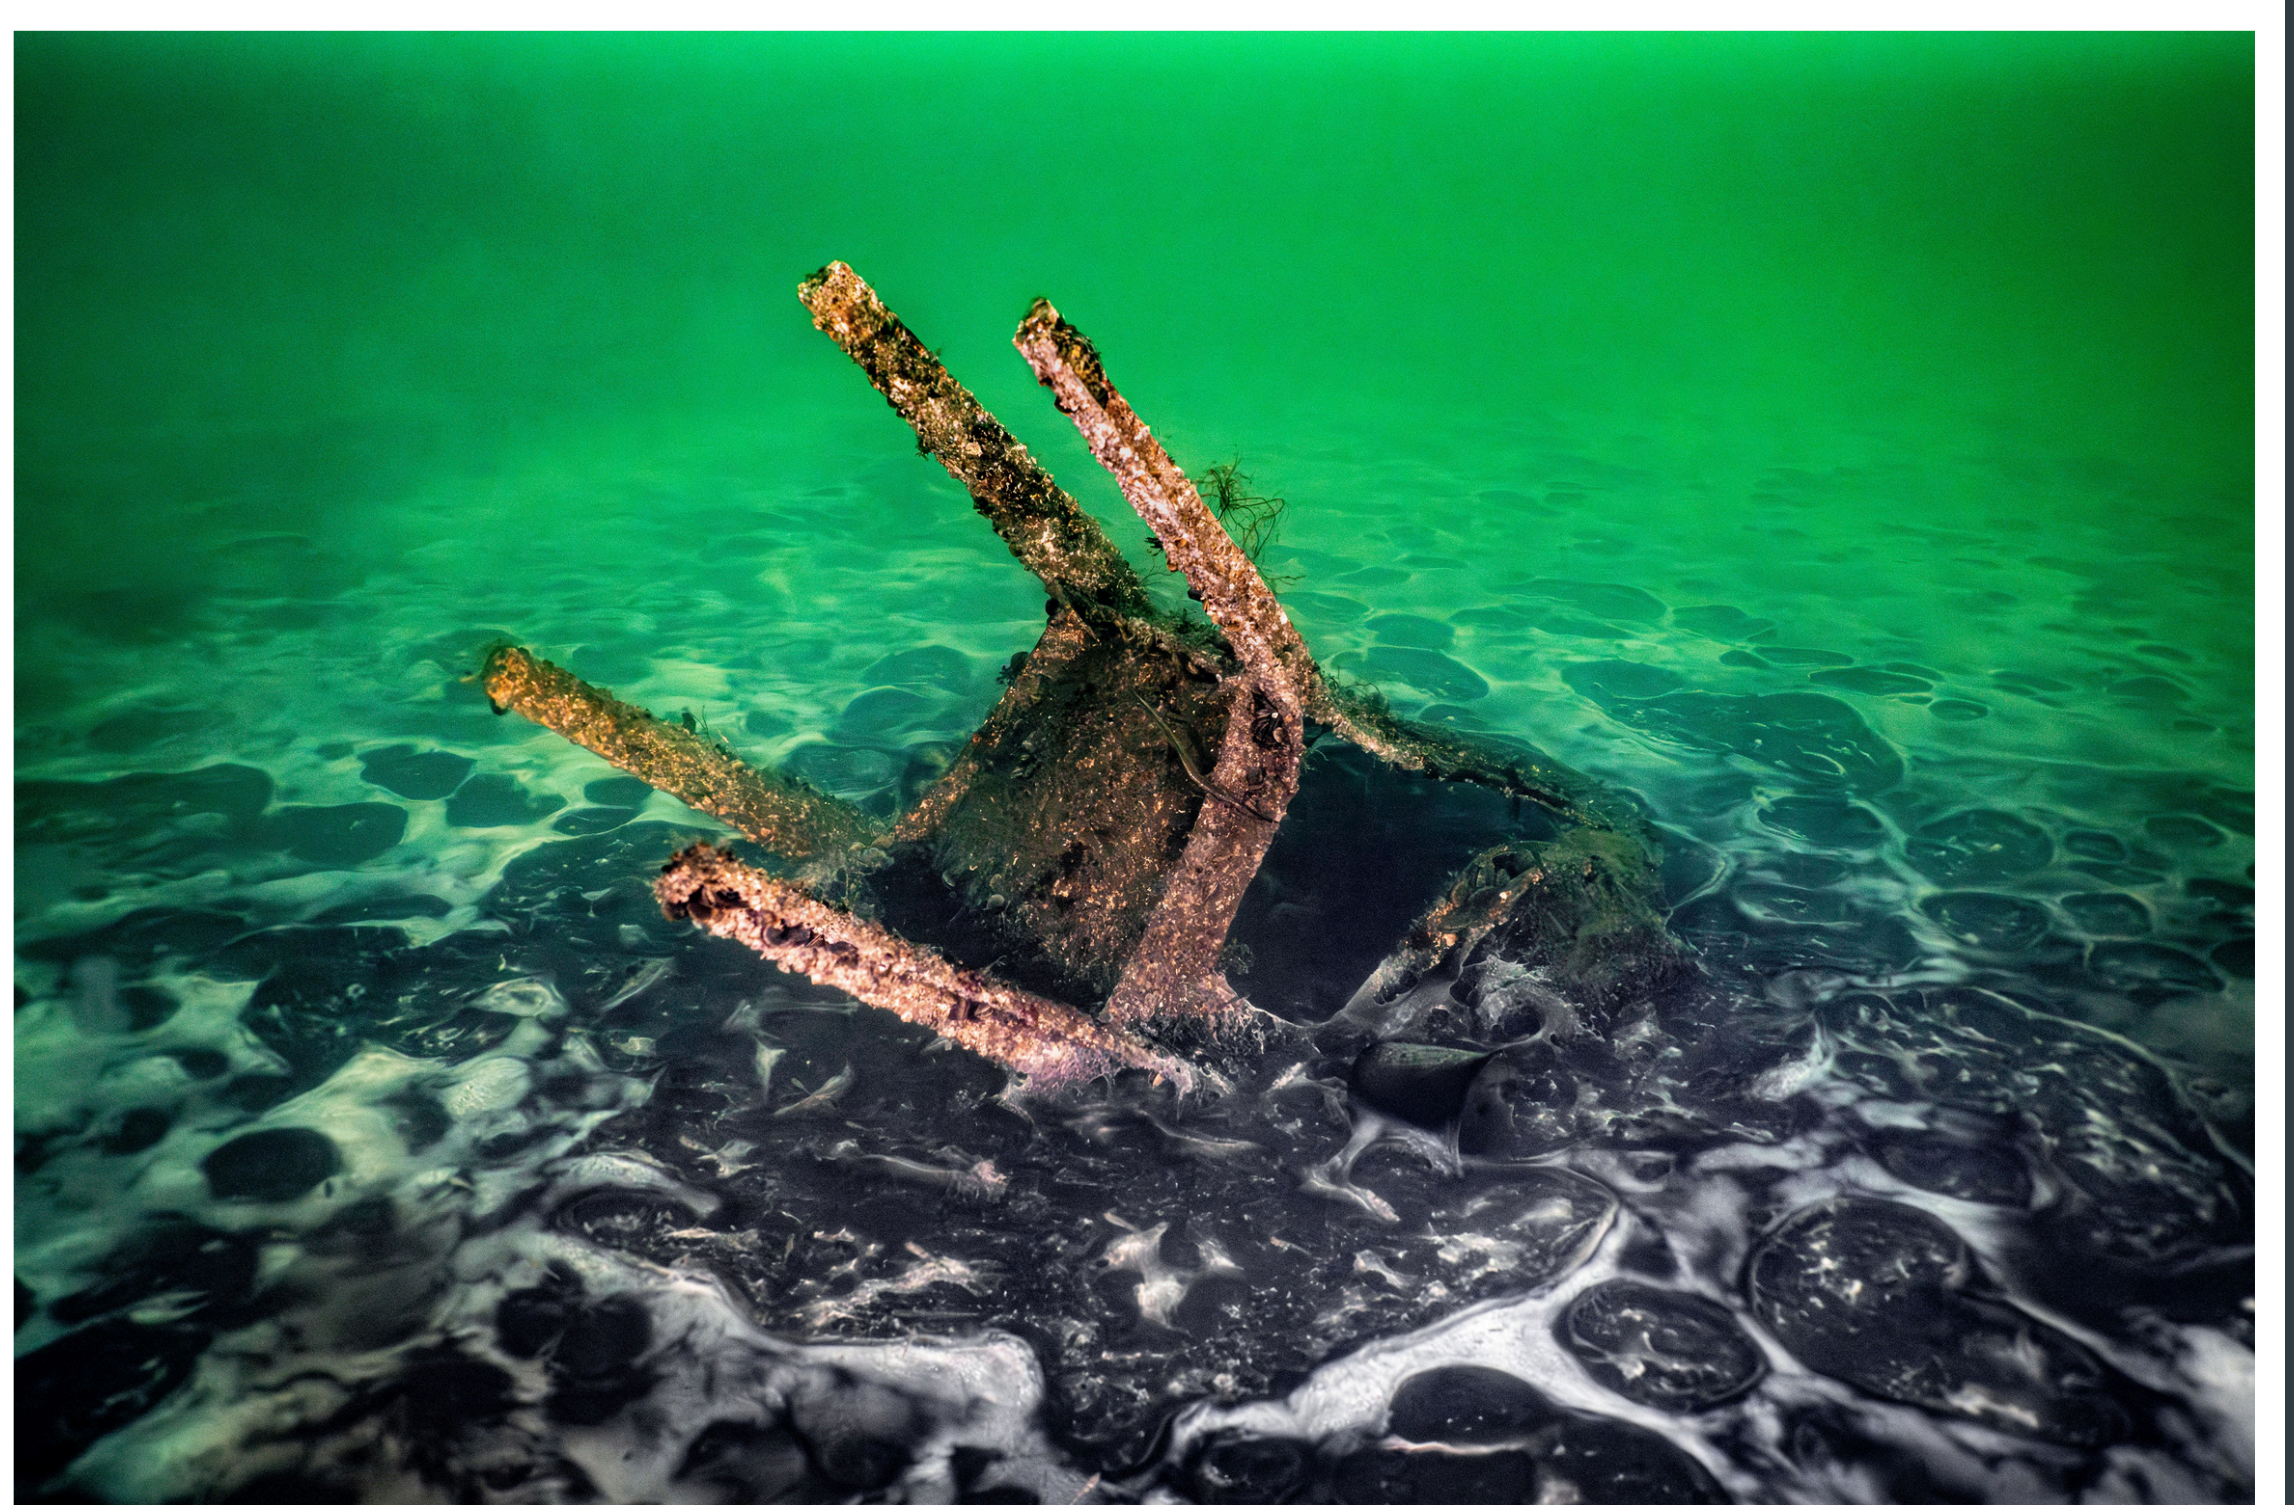

1. Johan Björklund

Summer beauty, a freshwater Garden of Eden. A fine lake with clear water and only few nutrients, filled with stoneworts. Natural light has been enough when shooting in shallow water. A perch in the photo too.

2. Gustaf Svensson

Mysterious chair, the image immediately stood out. The gloom and structure in the background created by the huge hydrogen sulfide-producing bacteria growth. Artificial light has made the color landscape change from black to poison green. The picture exudes the feeling of the end of the world.

3. Patrik Kolmodin

A great school of fish. The photo brilliantly combines natural backlighting with sunlight and just the right amount of flash to illuminate the fish in the foreground. Technically a great picture with great atmosphere.
