

Class D: Freshwater

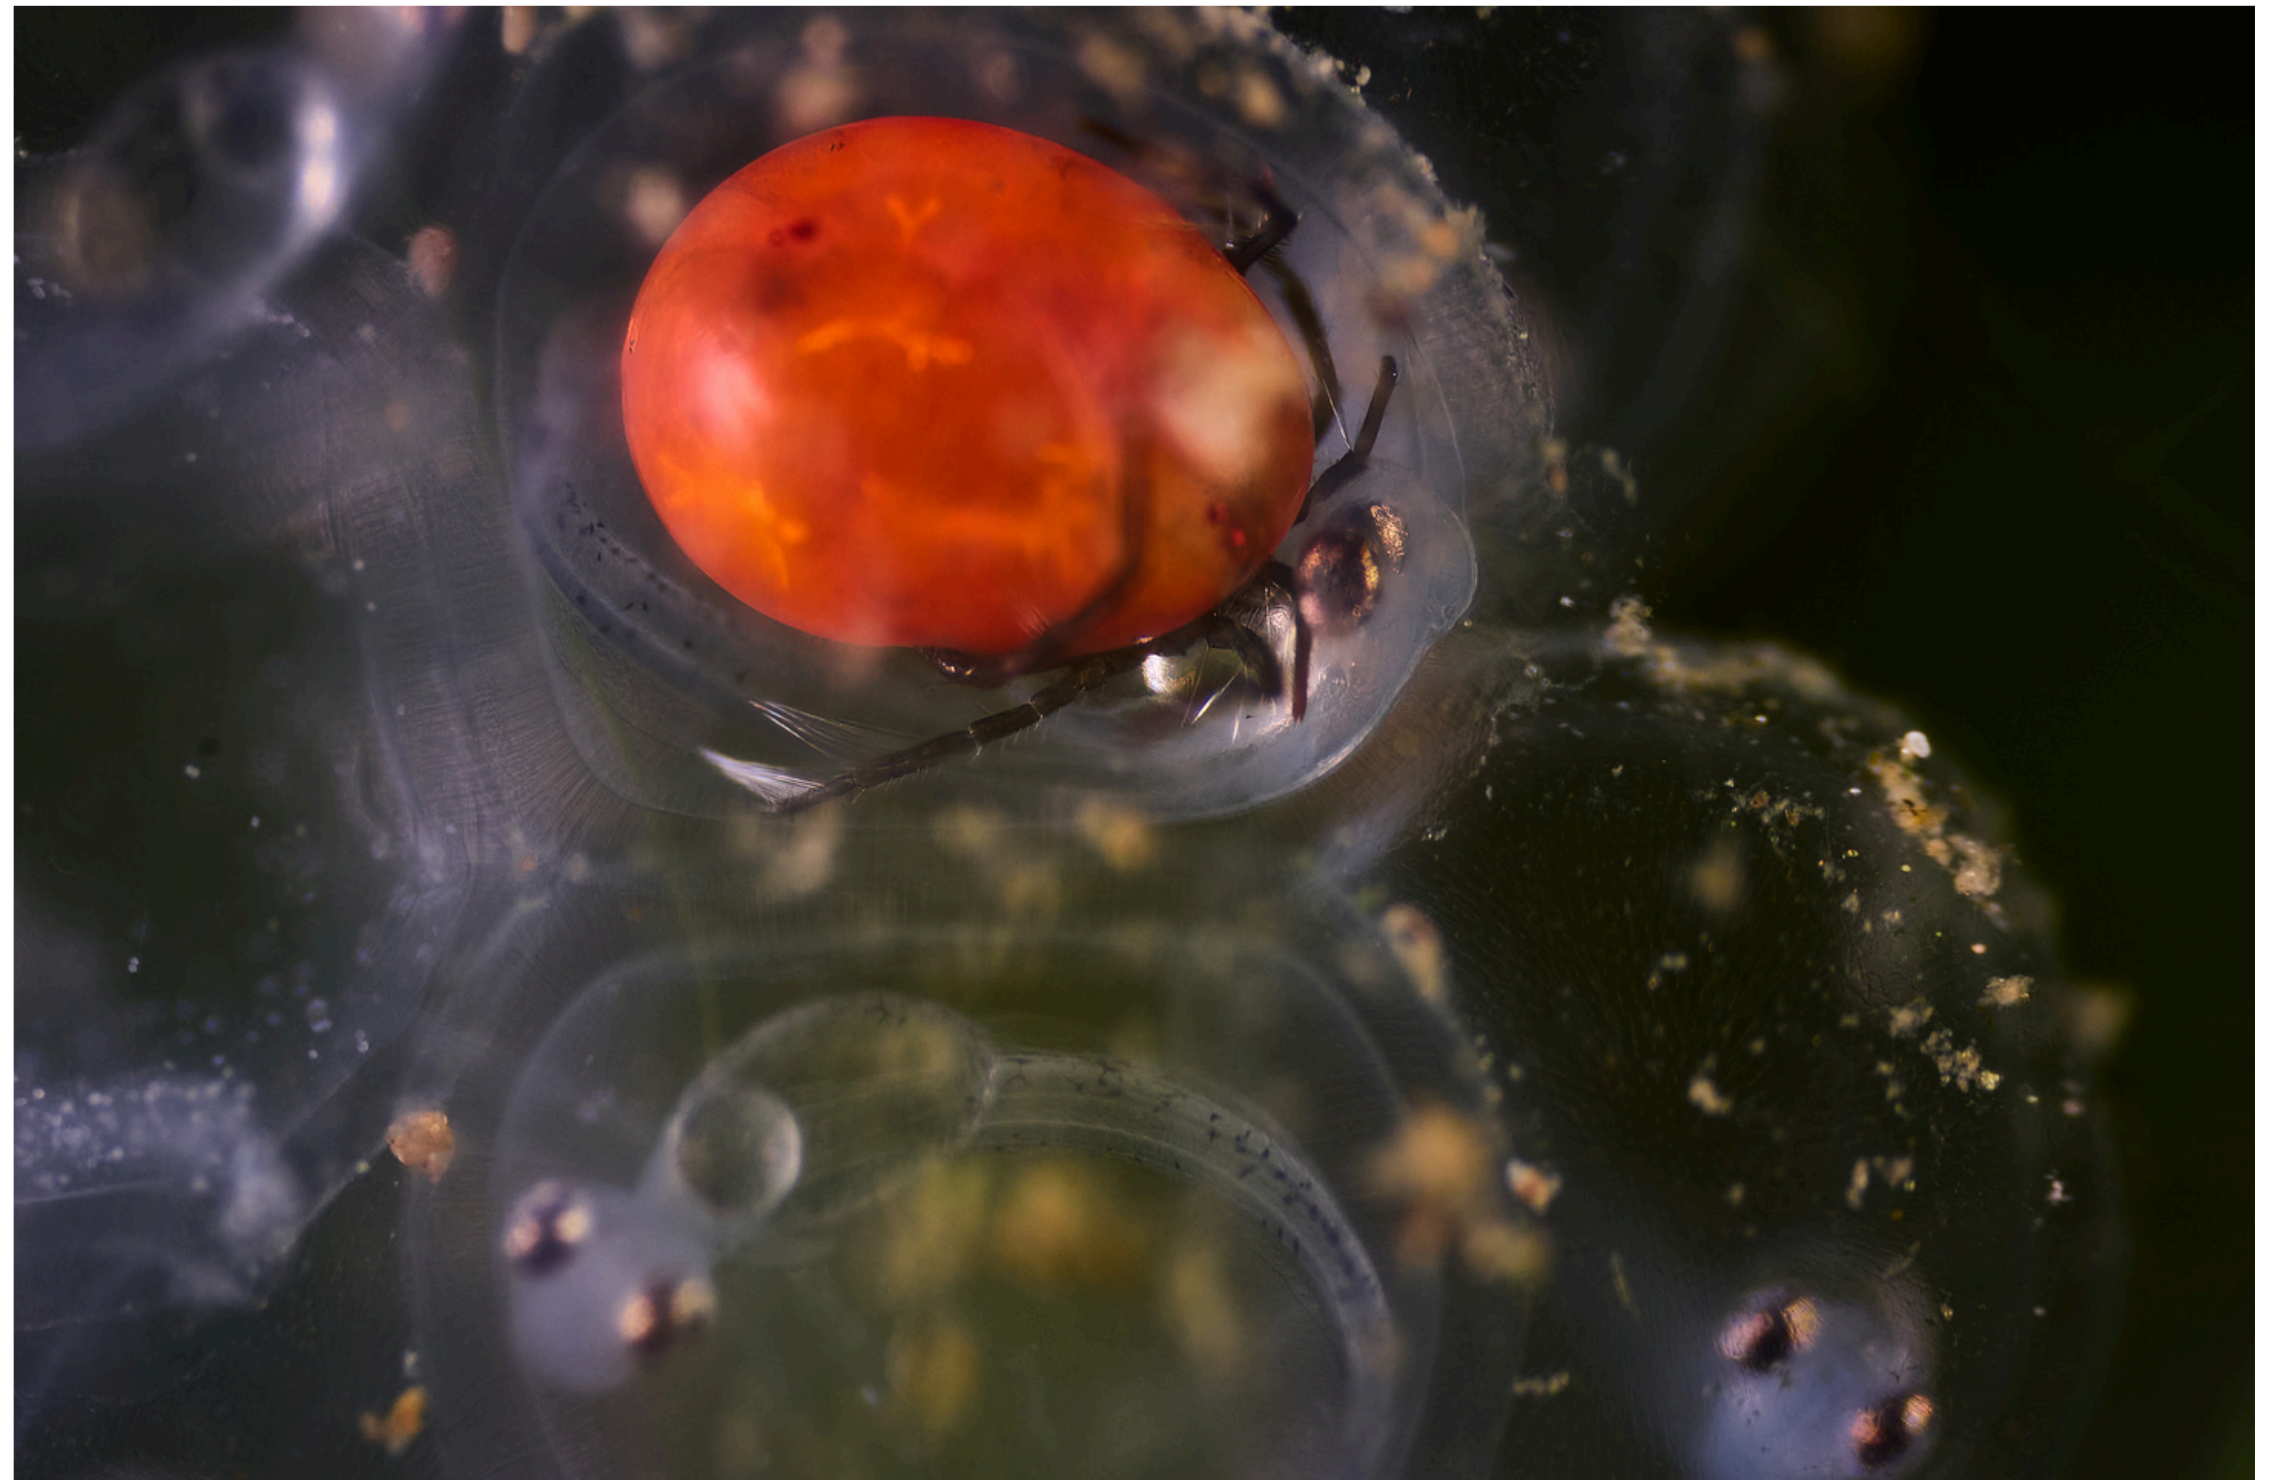

1. Nils Aukan

A large man-made landscape that has been taken over by nature. Delicious shades of green and blue in crystal water. A sense of adventure: a diver just swimming in, what he might find.

2. Mats Forsberg

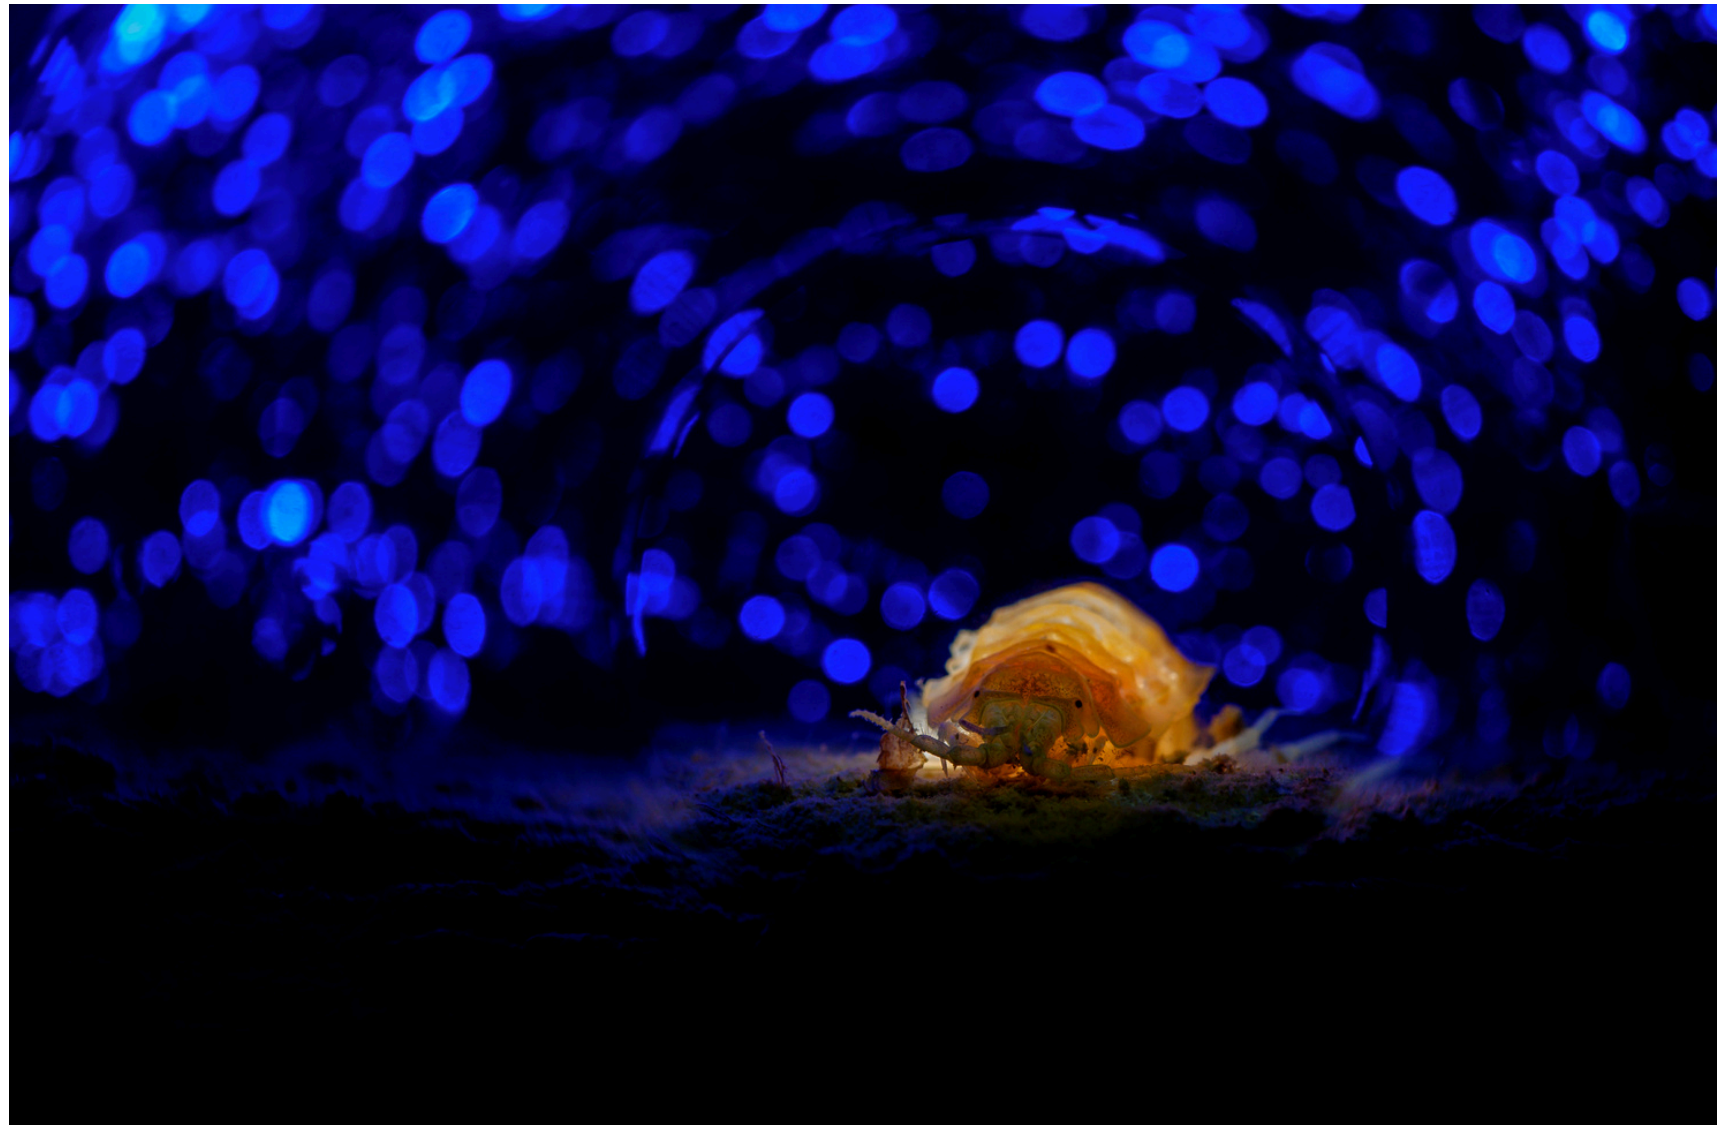

An encounter of two different species. The mite stands out nicely on the fish spawn, is it attacking the fish? The sharp-eyed photographer has found a very small fine object. Nicely composed, good colors.

3. Andreas Kron

Black goby rests on a wonderful mussel mattress. The shell structure, annual rings and siphons of the mussels are nicely visible.
